

# Online Conferencing

Video conferencing, holding webinars, peer-level web meetings (1:1, n:m), Screensharing

Mostly people speak of web conferencing ([Wikipedia \(en\)](#)):

*Web conferencing may be used as an umbrella term for various types of online collaborative services including web seminars ("webinars"), webcasts, and peer-level web meetings. It may also be used in a more narrow sense to refer only to the peer-level web meeting context, in an attempt to disambiguate it from the other types of collaborative sessions. Terminology related to these technologies is inexact, and no generally agreed upon source or standards organization exists to provide an established usage reference.*
